

CYBERSECURITY

Cyber Insurability Assessment

Cyber insurance is an important part of incident preparedness planning for many organizations, but coverage has never been harder to get. Insurers are setting stricter underwriting requirements, and premiums are rising – or coverage is being outright denied – for companies that cannot meet security and compliance standards.

Whether you are shopping for your first cyber insurance policy, or want peace of mind heading into renewal discussions, our confidential [Cyber Insurability Assessment](#) can help you understand how you measure up to cyber insurance qualification requirements.

On a monthly basis, we provide a scorecard report, similar or identical to the one run by insurance companies, that identifies the areas that need to be addressed to help you qualify for new cyber insurance coverage or renew your existing coverage.

Most importantly, our assessments can help you identify a roadmap for mitigating significant exposures that might result in cyber breaches and lead to insurance claims and reputational damage.

WHAT'S IN THE MONTHLY ASSESSMENT?

The report identifies issues in 10 major security categories	
Network Security	Application Security
DNS Health	Cubit Score
Patching Cadence	Hacker Chatter
Endpoint Security	Information Leak
IP Reputation	Social Engineering

For pricing and more information, please visit [Cyber Insurability Assessment](#).

OUR WINNING METHODOLOGY

ISA Cybersecurity's proven methodology for delivering our Cyber Insurability Assessment is based on industry standards and enhanced by our extensive experience with the insurance industry and deep technical experience.

Our assessment will provide a clear understanding of any security weaknesses that will catch the eye of cyber insurance underwriters, giving you time to address concerns before you go to market.

DELIVERABLES

- Convenient monthly reports
- A clear insurability assessment identifying the areas you need to address for cybersecurity improvement
- Issues ranked by severity to help prioritize remediation approach

BENEFITS

- Identify potential risks in your cybersecurity program that could raise premiums or even disqualify your cyber insurance application
- Shape and scope security investment decisions
- Prioritize areas of greatest impact to cyber insurance policy coverage and renewal
- Align business with cybersecurity-related initiatives
